

Alpha Source Group

Meeting the demands of
tomorrow's healthcare, **today.**

About ASG

BUILT FOR A NEW GENERATION OF HEALTHCARE

For healthcare providers, lower reimbursements have driven consolidations and made it more difficult for them to service their own equipment.

In turn, providers have turned up the pressure on equipment servicers to deliver value based solutions and extend equipment life even longer, which has led to consolidation amongst these companies.

The legacy service delivery model cannot meet these demands, which is why we built a next generation model and capabilities.

SURGICAL SOLUTIONS
POWERED BY  Alpha Source Group

Alpha Source Group delivers service and solutions under three brands —

Alpha Source, Medical Optics and BC Technical. Each organization brings its specialty in either biomed, surgical or imaging solutions to create a comprehensive set of capabilities.

So with Alpha Source Group, the answer to your medical equipment repair and maintenance needs is always “YES!”

Vendor Agnostic.

Our business model includes a strategic intent to be a vendor agnostic partner enabling OEMs, ISOs and Asset Management companies to develop and implement custom, innovative service solutions. We are small enough to respond to the unique needs of our partners, and large enough to leverage our scale to quickly and efficiently absorb new service programs.

Quality in Every Interaction.

Alpha Source Group companies have a rigorous Quality Management System (QMS) and are ISO 13485:2016 and/or ISO 9001:2015 certified.

Our Quality Standards have been reviewed by the most sophisticated medical equipment OEMs in the world, and their willingness to partner with us is a testament to our commitment to Quality and Continuous Improvement.

Project Management as Core Capability.

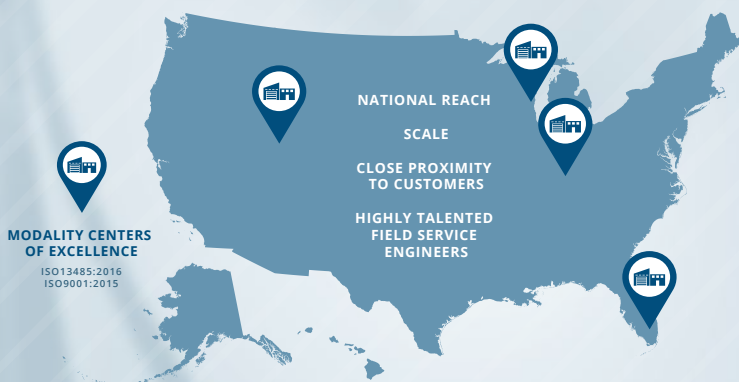

We have proven project management capabilities, having executed many large scale programs. Our approach is comprised of three phases: Initiate, Plan, and Execute. This robust project management approach is governed by a Steering Committee that regularly engages with our customer partner to ensure project success.

Field Service Expertise and Reach.

We are the largest independent, full service, imaging services and equipment repair solutions company in the United States. We provide service to an installed base of over 40,000 pieces of imaging equipment with field service offerings that range from comprehensive contracts to preventative maintenance contracts or time and materials arrangements.

Our highly-skilled engineers are equipped to complete repairs as proficiently as possible because we provide:

- Nationwide service for CT, MRI, PET, PET/CT, NucMed, Ultrasound, BMD, and SPECT/CT equipment.
- Training, certification and technical support.
- Exclusive availability to parts – either via trunk-stock or via our next-day shipping program.
- All-encompassing preventative maintenance process.

Our **3F** Model

We're fast. We react with speed.

We're flexible. We solve unique problems.

We're friendly. We are brand neutral and collaborative.
